

Extensions

This section contains a detailed list of extensions that are included with Blesta, and are categorized by type.

Extension Types

Gateways

Gateways allow for the processing of one time or recurring payments and can be one of two types: Merchant, or Non-Merchant.

Messengers

Messengers are useful for sending notifications through different methods, like SMS and voice calls.

Modules

Modules are useful for the provisioning, suspension, unsuspension, or cancellation of services. Some modules have advanced management capabilities.

Plugins

Plugins are the most powerful type of extension, and can add substantial functionality to Blesta, including new pages, widgets, and functionality.
