- 2 Download Manager Overview
  - 2.1 Adding a Category
  - 2.2 Adding a Download
  - 2.3 Adding a Static Url

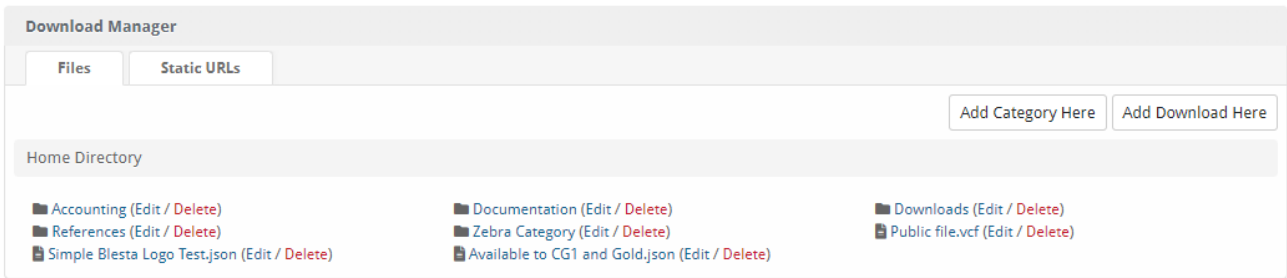

## Installing Download Manager

1. Visit [Settings] > [Company] > [Plugins] > Available.
2. Click the "Install" button within the Download Manager plugin listing.

## Download Manager Overview

Once installed, clicking the "Manage" button for the Download Manager plugin will display the overview.

## Adding a Category

To add a category, click the "Add Category Here" button from the root directory, or sub-directory where you wish it to appear. You can navigate into an existing directory by clicking the directory name.

1. Enter the Name of the category
2. Enter a Description for the category
3. Click "Create Category" to create the category.

The screenshot shows the 'Add Category to the Home Directory' form. It has a title bar with the same text. Below the title bar, there is a 'Name' field with a text input box. Below that is a 'Description' field with a rich text editor. The rich text editor has a toolbar with buttons for Bold (B), Italic (I), Highlight (H), Link, Image, Bulleted List, Numbered List, Code, and Quote. There is also a 'Preview' button. At the bottom right, there are two buttons: 'Cancel' and 'Create Category'.

## Adding a Download

To add a download, click the "Add Download Here" button to add a new download within the root directory, or sub-directory where you wish it to appear. You can navigate into an existing directory by clicking the directory name.

1. Select Publicly Available, or Must be logged in to set the permissions required for this download. If Must be logged in is selected, the download can be restricted by client group, or available packages, or both.
2. Enter the name for this download without a file extension, for example "Racecar".
3. Choose to upload the file, or specify a path on your server to the file.
4. Click "Add Download" to add the download.

Add Download to the Home Directory

☐ Publicly Available
☒ Must be logged in

☐ Available to Client Groups

☐ Available to Packages

Name

☒ Upload File
☐ Specify Path to File

File

No file chosen

## Adding a Static Url

To add a static url, click the "Static URLs" tab then click the "Add Static URL" button.

Download Manager

Files
Static URLs

URL	File	Link	Options
logo	 <a href="#">/Simple Blesta Logo Test.json</a>	<a href="http://blesta.local/download/logo">http://blesta.local/download/logo</a>	<a href="#">Edit</a> , <a href="#">Delete</a>

1. Enter a URL ending. For example entering "logo" will result in the url <http://blesta.local/download/logo>
2. Select a previously updated file OR select the "Category" option and select a previously added directory (the URL will then download the most recently added file from that directory).
3. Click "Add URL" to add the static URL.
