### Summary

This is a bug fix release that corrects issues with [5.0.0](#).

**i** If you have not yet upgraded to 5.0, we recommend you skip 5.0.0 and upgrade directly to 5.0.4 or newer. This release does not automatically update your database collation from utf8\_unicode\_ci to utf8mb4\_unicode\_ci like 5.0.0 would do. To update your collation, visit [Tools > Utilities](#) post upgrade or installation and click the button to update your collation. Please note that it can take several minutes or more to complete.
