About Authorize.net

Authorize.net is one of the most popular payment gateways in the United States. Learn more about Authorize.net on their website at <http://www.authorize.net/>.

Blesta is partnered with [EVO](#) to offer customized payment solutions for your business. [Sign up](#) for an EVO merchant account bundled with an Authorize.net gateway today!

Credit Card Processing Features

Local Storage	Token Storage	Process	Refund	Void
YES, AIM	YES	YES	YES	YES

* With Token Storage, credit card details pass through Blesta to Authorize.net's API. Blesta never stores the credit card number.

Installing Authorize.net Accept.js

To install the Authorize.net payment gateway, visit [Settings] > [Company] > [Payment Gateways] > Available, and click the "Install" button for Authorize.net Accept.js.

Authorize.Net Accept.js (ver 1.0.0) [Signup](#)
Author: Phillips Data, Inc.

---------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

When finished, click "Update Settings" to save the details. You have successfully installed and configured Authorize.net!

Potential Issues

Q: When in sandbox mode, I get an error that says "Payment could not be authorized for the selected payment account. Please select a different account or try again." during checkout.

A: Please use the American Express test card from https://developer.authorize.net/hello_world/testing_guide.html Some of the other cards do not pass the regular expression card type checks as a real card would.

- Credit Card emails (e.g. *Payment Approved (Credit Card)*) may have missing content when payment is made without saving the details as a payment method. To help with this, replace "{card_type}" with "{card_type | set_default "credit card"}" and replace ", ending in {last_four}" with "{% if last_four %}, ending in {last_four}{% endif %}"
