About Paystack

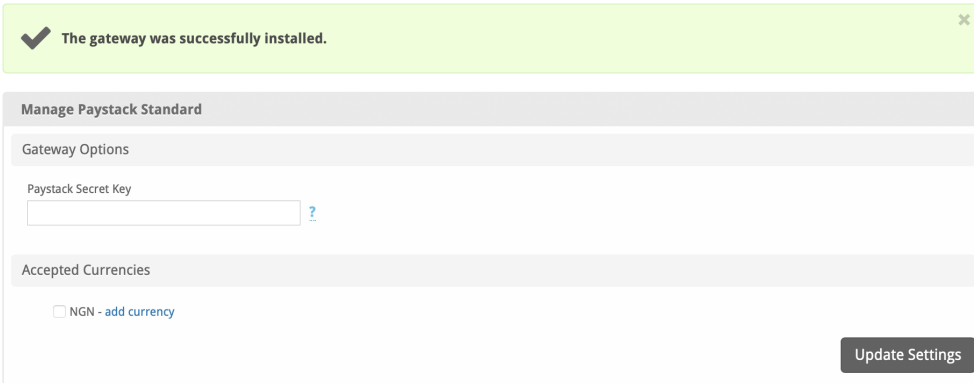

Paystack is a payment processor for Africa. Learn more about Paystack on their website at <https://paystack.com/>.

Installing Paystack

To install the Paystack payment gateway, visit [Settings] > [Company] > [Payment Gateways] > Available, and click the "Install" button for Paystack.

A message will be displayed, indicating that the payment gateway was successfully installed.

Enter the details provided by Paystack.

| Field Name | Description |
|---------------------|---|
| Paystack Secret Key | Enter the Secret Key provided by Paystack. |
| Accepted Currencies | Check the currencies that you would like to be processed through this payment gateway. The following currencies are available: NGN |

When finished, click "Update Settings" to save the details. You have successfully installed and configured Paystack!

Common Issues

Transactions are not being created in Blesta after a client makes a Paystack payment.

Make sure Paystack's IPN is enabled. If it's not enabled, you will need to set a URL.

1. Log into your Paystack account
2. Go to Settings then "API Keys & Webhooks"
3. Enter the Webhook URL and hit "Save"

The Webhook URL will be something like https://yourdomain.com/blesta_directory/callback/gw/1/paystack where "1" is your company ID. If you do not have any add-on companies, or don't know what that is, use "1".
