Enter the details provided by Authorize.net.

⚠ In order to use Developer Mode, see the instructions in the testing guide https://developer.authorize.net/hello_world/testing_guide/

⚠️

Field Name	Description
Login ID	Enter the Login ID provided by Authorize.net for API requests.
Transaction Key	Enter the Transaction Key provided by Authorize.net for API requests.
Payment API	Select AIM for local storage, and CIM for token storage. If you are using CIM, please ensure that it's enabled for your Authorize.net account.
Payment Account Validation Mode	This controls what type of validation is performed when a payment account is stored using CIM. 'None' performs no additional validation. 'Test' issues a test transaction that does not appear on the customer's statement but will generate an email to the merchant. 'Live' processes a $0.00 or $0.01 transaction that is immediately voided. Consult your Merchant Account Provider before setting this value to 'Live' as you may be subject to fees.
Test Mode	Check to enable Test Mode. Test mode is only available when using the AIM Payment API. Transactions submitted in Test Mode will not settle.
Developer Mode	Check to enable Developer Mode. In this mode, transactions will be posted to the Authorize.net developer environment. You must have a developer test account in order to use this environment.
Accepted Currencies	Check the currencies that you would like to be processed through this payment gateway. **The following currencies are available:** CAD, GBP, EUR, USD

When finished, click "Update Settings" to save the details. You have successfully installed and configured Authorize.net!
