

Invoice Delivery (Paid)

Table of Contents

- 1 Description
- 2 Supported Tags

Description

This email template is sent when a scheduled paid invoice is delivered to the client. It will contain a PDF attachment of the invoice. Each of the clients' billing contacts will receive this email if any are set, otherwise the primary contact will receive the email.

Supported Tags

The tags described in Blesta are only a list of commonly-used tags, for brevity.

Because the **{invoices}** tag is an array of objects (i.e. possibly multiple invoices), it should not be used as written. Instead, you should configure the template to loop through each invoice individually by using the *for* notation described under [Customizing Emails](#).

Hi {contact.first_name},

An invoice has been created for your account and is attached to this email in PDF format.

{% for invoice in invoices %}

Invoice # {invoice.id_code}{% endfor %}

This invoice has already been paid, so no payment is necessary for this one, but your account may have other balances. To login to your account, please visit [http://{client_url}](#).

The tags below are all of those available for this email template. For other email and tag customizations, see [Customizing Emails](#).

Tag	Description	Notes	Since Version
{contact.first_name}	The client's first name		
{contact.last_name}	The client's last name		
{contact.email}	The client's email address		
{contact.id_code}	The client's ID	e.g. 1500	
{autodebit}	Whether or not autodebit is enabled for this client	i.e. 1 or 0, denoting yes or no, respectively	
{client_url}	The URI to Blesta's client interface	e.g. domain.com/billing/client/	
{payment_account.first_name}	The first name on the payment account assigned for autodebit		v4.4.0
{payment_account.last_name}	The last name on the payment account assigned for autodebit		v4.4.0
{payment_account.account_type}	The payment account type that is assigned for autodebit	i.e. "cc" or "ach"	v4.4.0
{payment_account.last4}	The last four digits on the payment account assigned for autodebit		v4.4.0

Due to the nature of tag objects containing several fields, many of which are likely irrelevant for use in email templates, but may be useful to you in certain circumstances, an example dump of the tag objects are shown below.

The {contact} object

```
stdClass Object
(
    [id] => 1
    [client_id] => 1
    [user_id] =>
