About CoinGate

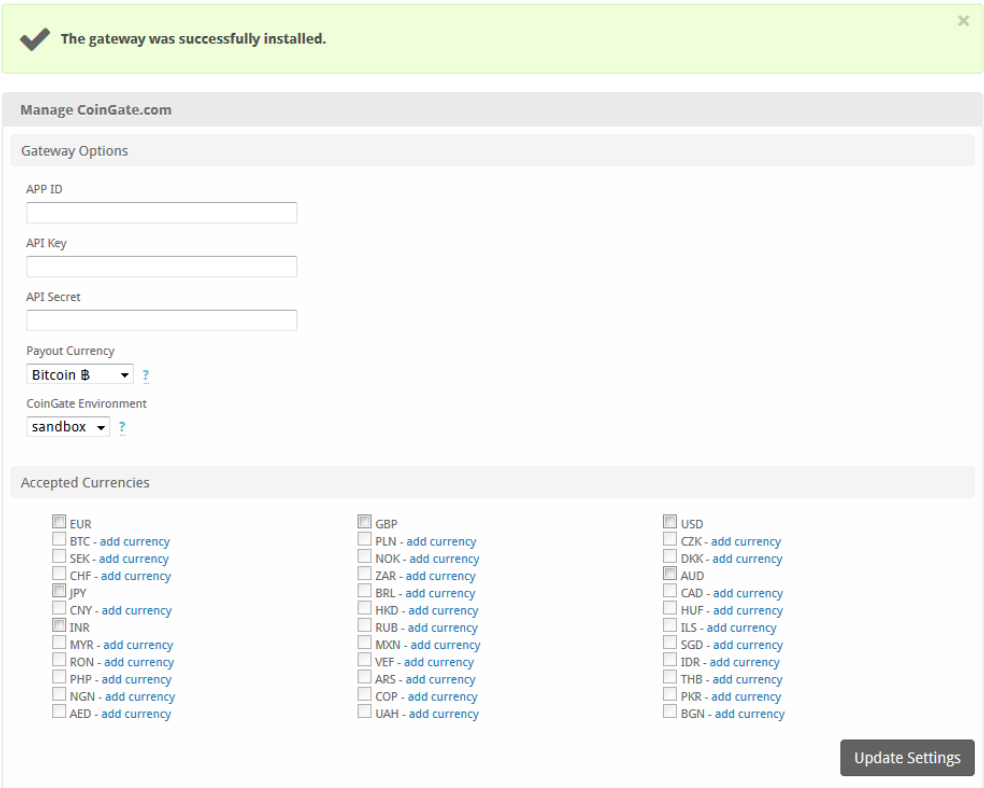

CoinGate is a payment gateway for Bitcoin, Litecoin, Ethereum and 50 other cryptocurrencies. Learn more about CoinGate on their website at <https://coingate.com/>.

Installing CoinGate

To install the CoinGate payment gateway, visit [Settings] > [Company] > [Payment Gateways] > Available, and click the "Install" button for CoinGate.

A message will be displayed, indicating that the payment gateway was successfully installed.

Enter the details provided by CoinGate.

Field Name	Description
APP ID	Enter the APP ID provided by or configurable within CoinGate.
API Key	Enter the API Key provided by or configurable within CoinGate.
API Secret	Enter the API Secret provided by or configurable within CoinGate.
Payout Currency	Currency you want to receive when making withdrawal at CoinGate.
CoinGate Environment	Choose which environment to use for API requests (live or sandbox).
Accepted Currencies	<p>Check the currencies that you would like to be processed through this payment gateway.</p> <p>The following currencies are available:</p> <p>EUR, GBP, USD, BTC, PLN, CZK, SEK, NOK, DKK, CHF, ZAR, AUD, JPY, BRL, CAD, CNY, HKD, HUF, INR, RUB, ILS, MYR, MXN, SGD, RON, VEF, IDR, PHP, ARS, THB, NGN, COP, PKR, AED, UAH, BGN</p>

When finished, click "Update Settings" to save the details. You have successfully installed and configured CoinGate!

Use API v1

Only have an API Auth Token? Coingate has released an updated API called v2. You will need to use the v1 API.

To obtain your APP ID, API Key, and API Secret, log into Coingate and go to Merchant > API > Apps, and create a new App. Select the API v1 tab to obtain the necessary credentials. Here's a screenshot for reference:

The screenshot shows the Coingate web interface. On the left is a sidebar menu with options: Dashboard, Trader, Merchant, Orders, Withdrawals, Point of Sale, Payment Buttons, Plugins, API, Apps (highlighted), Requests, Callbacks, and Account. The main content area is titled 'Your API Credentials' and includes a warning that credentials are shown only once. It features two tabs: 'API v2' and 'API v1' (selected). Below the tabs are input fields for 'API Key' (containing 'QilG1o5gCVhwaEDneF7/Nm') and 'API Secret' (containing 'pMFb8ln1w6RN4gZ39HtCfemo7VYyjkOs'). At the bottom, there is a list of app settings: Name (Blesta Dev), App ID (3124), Invoice Time (20 minutes), Underpaid Cover % (0.0%), IP Whitelist, and Send Paid Notification (Yes). A footer note states 'Plugin or API not working? See common Issues' with a help icon.
