## About Paystack

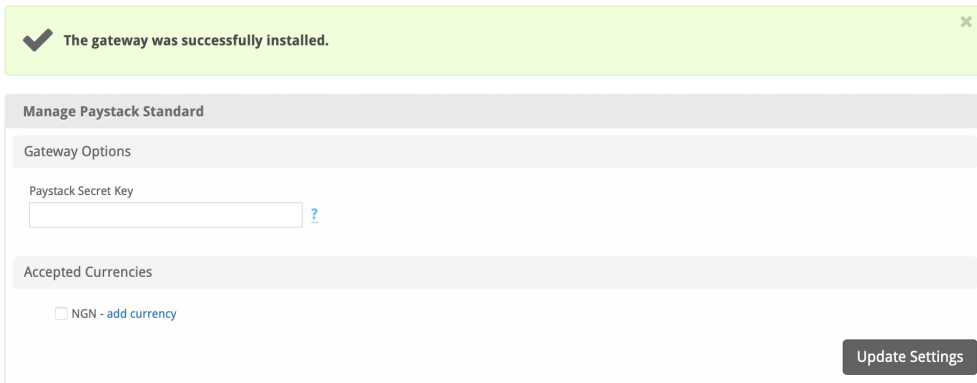

Paystack is a payment processor for Africa. Learn more about Paystack on their website at <https://paystack.com/>.

## Installing Paystack

To install the Paystack payment gateway, visit [Settings] > [Company] > [Payment Gateways] > Available, and click the "Install" button for Paystack.

A message will be displayed, indicating that the payment gateway was successfully installed.

Enter the details provided by Paystack.

Field Name	Description
Paystack Secret Key	Enter the Secret Key provided by Paystack.
Accepted Currencies	Check the currencies that you would like to be processed through this payment gateway.  <b>The following currencies are available:</b>  NGN, GHS, ZAR

When finished, click "Update Settings" to save the details. You have successfully installed and configured Paystack!

## Common Issues

**Transactions are not being created in Blesta after a client makes a Paystack payment.**

Make sure Paystack's IPN is enabled. If it's not enabled, you will need to set a URL.

1. Log into your Paystack account
2. Go to Settings then "API Keys & Webhooks"
3. Enter the Webhook URL and hit "Save"

The Webhook URL will be something like [https://yourdomain.com/blesta\\_directory/callback/gw/1/paystack](https://yourdomain.com/blesta_directory/callback/gw/1/paystack) where "1" is your company ID. If you do not have any add-on companies, or don't know what that is, use "1".
