

System > Companies

Before you can add additional companies, you need to purchase them. To do so, open a trouble ticket at <https://account.blesta.com/>.

Adding a Company

Companies may be added under [Settings] > [System] > [Companies].

Option	Description
Import Company Settings From	The company whose settings most closely match the company you're creating.
Name	The name to give the new company.
Hostname	Where the company will be accessible from (e.g. domain.com, or sub.domain.com). Be sure that this hostname points your Blesta installation.
Address	The street address for the company.
Phone	The phone number for the company.
Fax	The fax number for the company.

This may take a minute

Adding an additional company may take up to a minute as the system generates encryption keys and contacts the license server to verify the company can be added.
