

System > Backup

Blesta supports [Amazon S3](#), and Secure FTP (SFTP) backup options. One or both can be enabled, allowing offsite backups of Blesta's database at regular intervals. An On-Demand backup can also be performed, useful prior to upgrades or server transfers. To access Backup Settings visit [Settings] > [System] > [Backup].

mysqldump Required

 Backups require the "mysqldump" system binary. If this utility is not available on the server, or not executable by the web server or cron user, backups will not be possible.

Automation

 Backup tasks will not run unless enabled under [Settings] > [System] > [Automation]. The task there should run at least as frequently as the selected interval option for these backup methods.

Compression

 Backups will be automatically compressed if your system supports the [Zlib PHP extension](#), which will greatly reduce the file size.

Secure FTP

Secure FTP or SFTP has the following options:

Option	Description
Hostname	The FQDN of the backup server, i.e. "backup.domain.com".
Port	The port number, usually 22. This is the same port number as is used for SSH.
Username	The username for the account.
Password	The password for the account.
Path	The destination path to store backups, i.e. "/backup/".
Interval	<p>The frequency to perform backups. Note that backups must be scheduled under [Settings] > [Company] > Automation. Available options are:</p> <ul style="list-style-type: none">▪ Never▪ Hour▪ 2 Hours▪ 4 Hours▪ 6 Hours▪ 8 Hours▪ 10 Hours▪ 12 Hours▪ Day▪ 1.5 Days▪ 2 Days▪ 3 Days▪ 4 Days▪ 5 Days▪ 6 Days▪ 7 Days <p>A backup period of at least once daily is recommended.</p>

Amazon S3

For users with an [S3](#) account, Amazon S3 has the following options:

Option	Description
Region	The user's region used to determine the Amazon S3 endpoint.
Access Key	The Access Key provided by Amazon.
Secret Key	The Secret Key provided by Amazon.
Bucket	The name of the bucket as created in Amazon S3. (This is case sensitive)

Interval	<p>The frequency to perform backups. Note that backups must be scheduled under [Settings] > [Company] > Automation. Available options are:</p> <ul style="list-style-type: none">• Never• Hour• 2 Hours• 4 Hours• 6 Hours• 8 Hours• 10 Hours• 12 Hours• Day• 1.5 Days• 2 Days• 3 Days• 4 Days• 5 Days• 6 Days• 7 Days <p>A backup period of at least once daily is recommended.</p>

On Demand

There are two options available for an On Demand backup:

- 1. Force Offsite Backup - This will force the offsite backup(s) to run immediately.
- 2. Download Backup - This will immediately create a backup and prompt for download.
