

Reseller Configuration

Table of Contents

- 1 How It Works
 - 1.1 Configuration Capabilities
 - 1.2 Submitting a Configuration
- 2 Configuration Format

Blesta supports the ability for resellers to customize data specific to their users' installations through the use of a special configuration file. This allows resellers the ability to brand the experience for their customers, as well as provide additional information (through RSS/Atom Feeds) targeted for those users.

Reseller configurations are only available to **Value Added Resellers**, whose license keys begin with **var-**.

How It Works

After a user installs Blesta they enter their license key. If the license key begins with **var-**, the installation makes a request to our license server to fetch a config file specific to the reseller that issued the license. If the config file exists, the installation will process the config.

Configuration Capabilities

Configuration files have the ability to:

1. Install and set custom staff and client themes.
2. Set feed URLs for RSS/Atom feeds used by the [Feed Reader](#).
3. Install [Plugins](#), [Modules](#), and [Gateways](#).

Submitting a Configuration

To submit your reseller configuration file email sales and include it as an attachment. We'll review the file to ensure proper formatting and add it our license server.

Configuration Format

The reseller configuration file is a JSON encoded file containing a set of key/value pairs. Below is an example file.

Example Config

```
{
  "themes": [
    {
      "name": "VAR Theme Name",
      "logo_url": "//www.site.com/assets/logo.png",
      "type": "admin",

  "gateways": ["paypal_payments_standard"]
}
```

Option	Description				
themes	An array of theme objects. <table><tr><th>Option</th><th>Description</th></tr><tr><td>name</td><td>The theme name.</td></tr></table>	Option	Description	name	The theme name.
Option	Description				
name	The theme name.				

logo_url	The URL to the logo. Use <u>HTTPS</u> or protocol-relative URLs to ensure compatibility with both HTTP and HTTPS.
type	<ul style="list-style-type: none">• admin If this is an admin theme• client If this is a client theme

colors

A theme color object.

Admin themes (specify for 'admin' type only)

Option	Description
theme_header_bg_color_top	
theme_header_bg_color_bottom	
theme_header_text_color	
theme_navigation_background_color_top	
theme_navigation_background_color_bottom	
theme_navigation_text_color	
theme_navigation_text_hover_color	
theme_subnavigation_bg_color_top	
theme_subnavigation_bg_color_bottom	
theme_subnavigation_text_color	
theme_subnavigation_text_active_color	
theme_widget_heading_bg_color_top	
theme_widget_heading_bg_color_bottom	
theme_widget_icon_heading_bg_color_top	
theme_widget_icon_heading_bg_color_bottom	
theme_box_text_color	
theme_text_shadow	
theme_actions_text_color	
theme_highlight_bg_color	

Client themes (specify for 'client' type only)

Option	Description
theme_header_bg_color_top	
theme_header_bg_color_bottom	
theme_page_title_background_color_top	
theme_page_title_background_color_bottom	
theme_page_title_text_color	
theme_page_title_button_background_color_top	
theme_page_title_button_background_color_bottom	
theme_navigation_background_color_top	
theme_navigation_background_color_bottom	
theme_navigation_text_color	
theme_navigation_text_active_color	
theme_page_background_color	
theme_link_color	
theme_link_settings_color	

feeds

An array of feed URLs. The [Feed Reader](#) will automatically pick up on these feeds and display them to the user in the Staff interface.

plugins

An array of plugins to install. Only plugins shipped with Blesta may be installed. Supply the directory name of the plugin to install.

modules	An array of modules to install. Only modules shipped with Blesta may be installed. Supply the directory name of the module to install.
gateways	An array of gateways to install. Only gateways shipped with Blesta may be installed. Supply the directory name of the gateway to install.
