

# Payza

Closure

 Payza was closed in 2018 and is no longer available. It will be removed from future versions of Blesta.  
The Payza URLs have changed

 Payza has abruptly changed their domain from "payza.com" to "payza.eu". This affects payment transactions through this gateway. If you are using Blesta v4.6.0 or older, you must manually update the gateway source (under */components/gateways/nonmerchant/payza/payza.php*) to change references of "payza.com" to "payza.eu" in order to process payments again.

## About Payza

Payza is a popular payment gateway. Learn more about Payza on their website at <https://www.payza.eu/>.

## Installing Payza

To install the Payza payment gateway, visit [Settings] > [Company] > [Payment Gateways] > Available, and click the "Install" button for Payza.

A message will be displayed, indicating that the payment gateway was successfully installed.

The screenshot shows a web interface for managing the Payza gateway. At the top, a green banner with a checkmark icon and the text "The gateway was successfully installed." is displayed. Below this is a section titled "Manage Payza". Under "Gateway Options", there are input fields for "Merchant Email" and "API Password", each followed by a question mark icon. There is also a checkbox for "Sandbox Mode" with a question mark icon. Below the options is a section titled "Accepted Currencies" containing three columns of checkboxes and currency codes. The first column includes AUD, CHF, EEK, HKD, MYR, NZD, SEK, and ZAR, each with a link to "add currency". The second column includes BGN, CZK, EUR, HUF, MKD, PLN, and SGD, each with a link to "add currency". The third column includes CAD, DKK, GBP, LTL, NOK, RON, and USD, each with a link to "add currency". At the bottom right of the settings area is a dark grey button labeled "Update Settings".

You will need to ensure your Payza account has Encrypted Payment Details (EPD) Version 2 enabled.

### Enable EPDv2 in Payza

You can login to your Payza account, and under the Main Menu, visit [IPN Advanced Integration] and click the button to [Set up your IPN now]. Here, you should set the following settings:

- IPN Status: Disabled
- Allow Encrypted Payment Details (EPD): Enabled
- Enable EPD Version 2: Enabled
- Testmode: Disabled

### Activate the API in Payza

In your Payza account, under the Main Menu, visit [API Advanced Integration] and click the button to [Get Started Now]. Here, you should set the following settings:

- API Status: Enabled

If you would like to allow refunds via the API, be sure to generate an API Password, and set it in Blesta.

Enter the details provided by Payza.

| Field Name     | Description   |
|----------------|---|
| Merchant Email | Enter the merchant account email address, typically of the format "seller_1_name@domain.com". |
| API Password   | Enter the API Password. This is the password required to process refunds via the API.         |

|                     |   |
|---------------------|---|
| Sandbox Mode        | Check to enable Sandbox Mode. If checked, transactions will be processed in sandbox mode using your Payza account and they will not settle.   |
| Accepted Currencies | <p>Check the currencies that you would like to be processed through this payment gateway.</p> <p><b>The following currencies are available:</b></p> <p>AUD, BGN, CAD, CHF, CZK, DKK, EEK, EUR, GBP, HKD, HUF, LTL, MYR, MKD, NOK, NZD, PLN, RON, SEK, SGD, USD, ZAR</p> |

When finished, click "Update Settings" to save the details. You have successfully installed and configured Payza!
