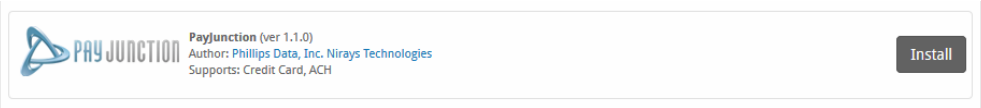
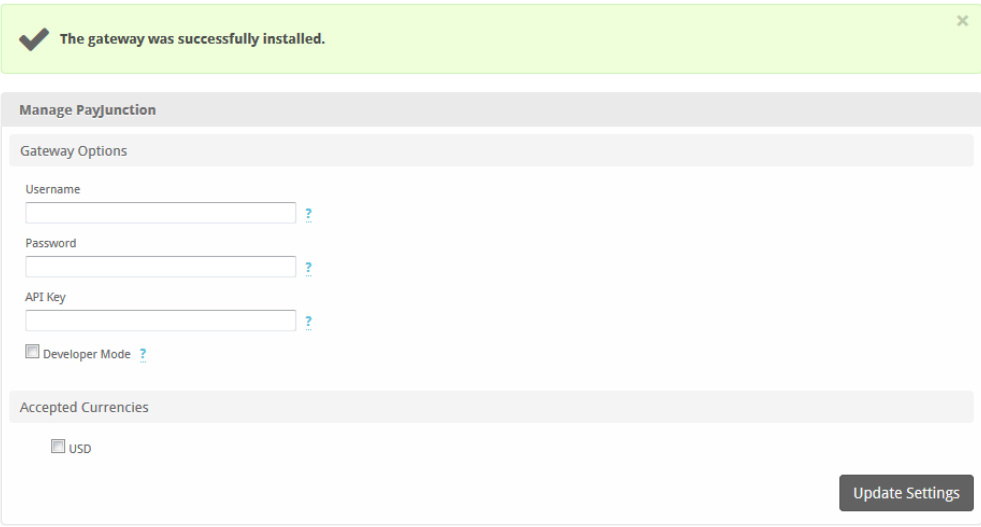
Installing PayJunction

To install the PayJunction payment gateway, visit [Settings] > [Company] > [Payment Gateways] > Available, and click the "Install" button for PayJunction.



A message will be displayed, indicating that the payment gateway was successfully installed.



Enter the details provided by PayJunction.

> In order to use Developer Mode, you must enter the PayJunction Labs developer account information. This includes their demo username and password along with the Labs API Key generated by PayJunction for your account.

Field Name	Description
Username	Enter your PayJunction account username.
Password	Enter your PayJunction account password.
API Key	Enter your account API Key. Separate keys are used for test mode and production. Be sure you're using the correct key.
Developer Mode	Check to enable Developer Mode. If Developer Mode is enabled, transactions will be posted to the PayJunction Labs demo account.

Accepted Currencies	Check the currencies that you would like to be processed through this payment gateway. **The following currencies are available:** USD

When finished, click "Update Settings" to save the details. You have successfully installed and configured PayJunction!
