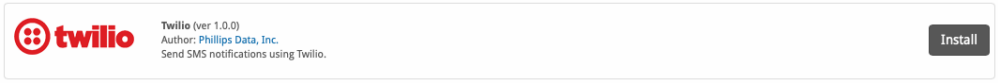
YES

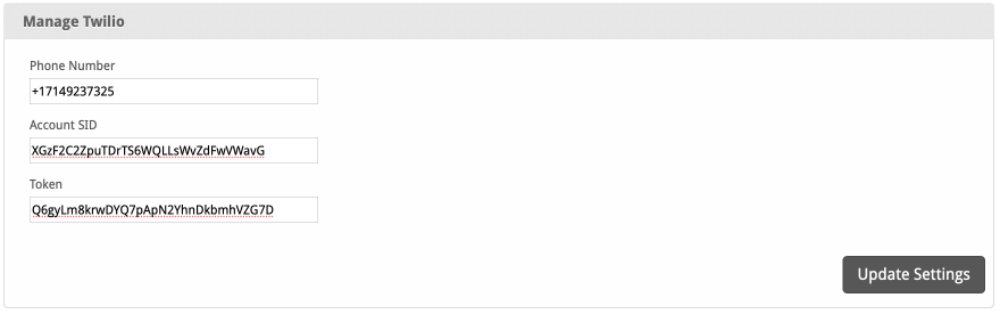
Installing Twilio

To install the Twilio messenger, visit [Settings] > [Company] > [Messengers] > Available, and click the "Install" button for Twilio.



A message will be displayed, indicating that the messenger was successfully installed. Then click the "Manage" button.

Enter the details for your Twilio account.



Field Name	Description
Phone Number	A Twilio number you own with SMS capabilities.
Account SID	Your Account SID.
Token	Your account authorization Token.

After filling out these options, click "Update Settings" to save your Twilio settings.

Final Steps

The only thing left to do is to enable notifications in the desired plugin. To find out which plugins support messenger notifications see the Plugins section.
