General Client Settings

Option	Description								
Enforce Unique Contact Email Addresses	Restricts email addresses for contacts. <table><tr><th>Option</th><th>Description</th></tr><tr><td>-- None --</td><td>Allow duplicate email addresses</td></tr><tr><td>Primary Contacts</td><td>No two primary contacts (i.e. clients) can have the same email address</td></tr><tr><td>All Contacts</td><td>No two contacts of any type can have the same email address as another contact</td></tr></table>	Option	Description	-- None --	Allow duplicate email addresses	Primary Contacts	No two primary contacts (i.e. clients) can have the same email address	All Contacts	No two contacts of any type can have the same email address as another contact
Option	Description								
-- None --	Allow duplicate email addresses								
Primary Contacts	No two primary contacts (i.e. clients) can have the same email address								
All Contacts	No two contacts of any type can have the same email address as another contact								
Force Email Usernames	Clients must use their email address as their username rather than defining their own. Existing clients can still login with their current username.								
Enable Email Verification	Check to send an email verification email when a new login is created or a client changes their email address. A notice will appear on the clients profile until they are verified.								
Prevent Payments from Unverified Clients	Do not allow payments from clients with an unverified email address								

Client Custom Fields

Custom client fields allow for additional information to be collected and stored for clients. These fields are configured on a per [client group](#) basis, allow only certain fields to appear for certain client types.

Custom client fields can be managed under [Setting] > [Company] > [Client Custom Fields].

Creating a Custom Field

To create a custom client field click the **Create Field** button on the Client Custom Fields page.

Editing a Custom Field

To edit a custom client field click **Edit** next to the field on the Client Custom Fields page.
