About PHPIDS

PHPIDS is an Intrusion Detection System plugin for Blesta that makes use of the open source [PHPIDS](#) library.

PHPIDS is designed to detect and block a variety of web attacks, and may block some legitimate requests if not configured properly.

Installing PHPIDS

1. Visit [Settings] > [Company] > [Plugins] > Available.
2. Click the "Install" button within the PHPIDS plugin listing.

PHPIDS (ver 1.8.0)

Author: [Phillips Data, Inc.](#)

Intrusion Detection System to help identify suspicious activity.

Install

Configuring PHPIDS

To configure PHPIDS, click the "Manage" button for the plugin under [Settings] > [Company] > [Plugins] > Available for the PHPIDS plugin.

The setting **Minimum Impact Rating to Redirect** has a lower limit value of **15**. Setting a lower value for this setting will default back to 15.
