Installing VPS.NET

1. Visit [Settings] > [Company] > [Modules] > Available.
2. Click the "Install" button within the VPS.NET module listing.

**VPS.NET**

VPS.NET (ver 2.10.0)
Author: [Phillips Data, Inc.](#)
VPS.NET provides virtualized server hosting.

Install

Configuring VPS.NET

In your VPS.NET account, you will need to generate an API Key, under [Profile], to allow API requests on behalf of your account. Make note of both the API Key and Email Address fields set here, as you will enter them in Blesta.

Your Profile

Update your account details below. If you wish to change your password, enter a new password, otherwise leave the password fields blank.

| | | | |
|------------|--|--|---|
| First Name | <input type="text" value="First"/> | E-Mail Address | <input type="text" value="email@domain.com"/> |
| Last Name | <input type="text" value="Last"/> | Send invoices to (If different) | <input type="text"/> We recommend Shoeboxed |
| Company | <input type="text" value="API Dev"/> | Password | <input type="password"/> |
| Address | <input type="text" value="API RD"/> | ...and confirm | <input type="password"/> |
| City | <input type="text" value="London"/> | API Key | <input type="text" value="FZlik72zl2PD0m=="/> Generate |
| State | <input type="text" value="London"/> | Mobile Number | <input type="text" value="United Kingdom +44"/> <input type="text" value="5554444"/> |
| Zip Code | <input type="text" value="E1 6QL"/> | Please select the appropriate country code. Do not prefix '0' to the Phone number. | |
| Country | <input type="text" value="United Kingdom"/> | VAT Number | <input type="text"/> |
| Time zone | <input type="text" value="(GMT-04:00) Eastern Time (US & C)"/> | | |

To configure VPS.NET in Blesta, visit [Settings] > [Company] > [Modules] > Installed, and click the "Manage" button for the VPS.NET module.

Manage VPS.NET

Add Server GroupAdd Server

VPS.NET Master Servers

| Server Label | Email | Options |
|--------------|------------------|---|
| Test VPS.NET | email@domain.com | Edit Delete |

VPS.NET Master Server Groups

| Group Name | Server Count | Options |
|--------------|--------------|---|
| VPS Group #1 | 1 | Edit Delete |

You may then add or update a server by setting the API credentials so that Blesta may communicate with VPS.NET.

Creating Packages

Welcome Email

The "Tags" section describes tags that may be used in the welcome email. The welcome email content is inserted into the "Service Creation" email template under [Settings] > [Company] > [Emails] > Service Creation. Only details unique to this service should be entered into the welcome email section for the package.

Sample Email

This sample email could be used in the Package Welcome Email section to help you get started. Be sure to enter content for your welcome email in both the HTML and Text sections.

```
Thank you for ordering your VPS, details below:

Hostname: {service.vpsdotnet_hostname}
IP Address: {service.vpsdotnet_primary_ip_address}
Username: root
Password: {service.vpsdotnet_password}

Thank you for your business!
```
