Security Advisories

Published Advisories

All published security advisories are available here.

Impact Key

Rating	Description
Critical	Vulnerabilities that allow arbitrary code execution by unauthenticated users.
High	Vulnerabilities that allow unauthorized users to escalated permissions or gather sensitive data that should otherwise only be available to authorized users.
Moderate	Vulnerabilities that would otherwise be Critical or High but only work in rare or unlikely scenarios.
Low	Vulnerabilities that are minor, and pose little or no consequence to the security and operation of the system.
