### Sign up at TheSSLStore.com

Blesta is partnered with The SSL Store. Sign up for a reseller account at <https://www.thessslstore.com/resellersignup.aspx?aid=52910428> and start offering a wide range of SSL certificates today.

### Plugin Companion

This module has a plugin companion called TheSSLStore Plugin that registers two Automation Tasks, including: SSL Order Synchronization, and SSL Certificate Expiration Reminder. It is suggested that you install this plugin after configuring the module.

## Supported Features

| Create | Cancel | Suspend | Unsuspend | Management | Config Options |
|--------|--------|---------|-----------|------------|----------------|
| YES    | NA     | NA      | NA        | YES        | YES            |

## Management Features

This module supports the following management features within the client area:

- View Certificate Details
- Generate Certificate (Supply CSR)
- Download Certificate
- Download Auth File
- Change Approver Email
- Resend Approver Email
- Re-Issue Certificate

## Installing The SSL Store

1. Visit [Settings] > [Company] > [Modules] > Available.
2. Click the "Install" button within the TheSSLStore Module module listing.

TheSSLStore Module (ver 1.2.0)  
Author: The SSL Store  
Sell SSL Certificates using this module.

Install

A message will be displayed, indicating that the module was successfully installed. Then click the "Add Credential" button.

 The module was successfully installed.

×

Manage TheSSLStore Module

Add Credential

In your [The SSL Store](#) account, you will find your Live and Test API Credentials, under [Integration] > [API Tokens]. Make note of your Reseller Name, Live Partner Code, Live AuthToken, Test PartnerCode, and Test Authtoken, as you will enter them in Blesta.

## Creating Packages

Packages define the pricing, welcome email, module and more. Packages can be assigned to Package Groups, and added to Order Forms. There are two ways to create Packages for your SSL Certificates.

### Using the The SSL Store Module:

1. Create a Standard Package Group under [Packages] > [Package Groups]. Name it something like "SSL Certificates".
2. Under [Settings] > [Company] > [Modules] > TheSSLStore Module, click the "Manage Button", then "Import Packages".

Manage TheSSLStore Module

Setup Package PricingImport PackagesUpdate Credential

3. Select the Package Group you created in Step #1 above, and enter the desired profit margin.

Settings

SSL Store Products Import

Select Package Group

SSL Certificates

Enter Desired Profit Margin

30

% Margin will apply to the price of all the products. You can change it later on from the price setup menu.

Import Packages

4. Click "Import Packages". You will be able to see a list of all the imported packages under Packages.

| Packages                                                                |                                                       |                    |           |                                                                      |

| Product Code           | Select the SSL Certificate or Product you'll be selling through this Package from The SSL Store. |

## Pricing

### Cancel at end of term

You may wish to check the "Cancel at end of term" box. This will prevent the SSL certificate from auto-renewing, requiring the client to place a new order if they wish to renew. Otherwise, the SSL certificate will renew automatically. When importing Packages through the module, this option will not be checked.

☐ Cancel at end of term  
☐ Enable Pro rata ?

| Field Name       | Description                                                                                                               |
|------------------|---------------------------------------------------------------------------------------------------------------------------|
| Term             | Enter the term for the desired pricing option. For example, if you wish to create a 3 month pricing option, enter 3 here. |
| Period           | Select "Month" for the period for this pricing option. <b>The SSL Store requires a period of Month.</b>                   |
| Currency         | Select the currency this pricing option is available for.                                                                 |
| Price            | Enter the price for this pricing option.                                                                                  |
| Setup Fee        | If there is a setup fee, enter it here.                                                                                   |
| Cancellation Fee | If there is a fee to cancel early, enter it here.                                                                         |

Click the "Add Additional Price" to add more pricing options. It's common for people to create 1 Month, 3 Month, 6 Month, and 1 Year price options. There are many possible combinations.

You've successfully completed the purchasing process for an SSL Certificate! But wait, your SSL still requires a few more steps which can be easily done at the following URL:  
[http://pho7blesta.com/client/services/manage\(service\\_id\)/tabClientGenerateCert/](http://pho7blesta.com/client/services/manage(service_id)/tabClientGenerateCert/)

OR

If you are using AutoInstall SSL then please follow the below steps:

Now that your SSL purchase is complete, it's time to set up and install your new SSL certificate automatically!

To use our AutoInstall SSL technology, the fastest and easiest way to get your new SSL certificate set up, please login to your cPanel/Plesk control panel, click on the AutoInstall SSL icon.

The "Tags" section describes tags that may be used in the welcome email. The welcome email content is inserted into the "Service Creation" email template under [Settings] > [Company] > [Emails] > Service Creation. Only details unique to this service should be entered into the welcome email section for the package.

## Sample Email

This sample email could be used in the Package Welcome Email section to help you get started. Be sure to enter content for your welcome email in both the HTML and Text sections.

You've successfully completed the purchasing process for an SSL Certificate! But wait, your SSL still requires a few more steps which can be easily done at the following URL:

```
http://account.yourdomain.com/client/services/manage/{service.id}/tabClientGenerateCert/
```

OR

If you are using AutoInstall SSL then please follow the below steps:

Now that your SSL purchase is complete, it's time to set up and install your new SSL certificate automatically!

To use our AutoInstall SSL technology, the fastest and easiest way to get your new SSL certificate set up, please login to your cPanel/Plesk control panel, click on the AutoInstall SSL icon. Then use the following Token for the automatic installation of Store Order ID : {service.thesslstore\_order\_id}.

Token : {service.thesslstore\_token}

You'll be guided through the entire process from there, and it should only take a few minutes.

If you experience any problems or have any questions throughout the process, please feel free to open a support ticket, we know all the ins and outs of SSL and can quickly help you with any issues. Thank you for trusting us with your web security needs.

When creating or editing a package that uses this module, the following tags will be available:

| Tags                               | Description                                                     | Notes                                                                      |
|------------------------------------|-----------------------------------------------------------------|----------------------------------------------------------------------------|
| {service.<br>thesslstore_order_id} | The host name of the server that the service was provisioned on | e.g. "12345"                                                               |
| {service.<br>thesslstore_token}    | The SSL Token                                                   | Can be used for automatic SSL Certificate installation on cPanel or Plesk. |

## Group Membership

Group Membership

A package must belong to at least one group to be usable.

Member Groups

SSL Certificates

Available Groups

<

>

Update Package

If this is the first Package you are creating with this module, select the "Create a New Group" option, and enter a Group name. If you are adding a subsequent Package and wish for it to be part of the same group, select "Select from Available Groups", and move the group from the right to the left of the multi-select box.

When finished, click "Create Package" to create this package.

## Final Steps

The only thing left to do is to add this Package Group to an order form so clients may place orders for your cPanel servers. See [Creating an Order Form](#) for more details.
