- 2 License Module for WHMCS
 - 2.1 Download and Install the Module
 - 2.2 Configure Your Products
 - 2.3 Configure Your Product Addons
- 3 License Module for Hostbill

Blesta license resellers can use a module for automatic provisioning and management of Blesta licenses.

Blesta License Module

Included with Blesta is the Blesta License module. The Blesta License module integrates with the Blesta [Reseller API](#) to handle the creation, cancellation, suspension, unsuspension, and re-issue of Blesta Licenses. Please visit [Blesta License](#) for information on installing and configuring this module to sell Blesta licenses from your Blesta installation.

License Module for WHMCS

Companies that use WHMCS can offer Blesta licenses to their customers with the Blesta License module for WHMCS.

Download and Install the Module

Updated Module

The WHMCS License module was last updated on April 7, 2021 to add support for offering Blesta as either a direct product or an addon product. Updated on April 20, 2021 to add tag support for offering Blesta as an addon.

Download [blesta-license-module-for-whmcs.zip](#) to your computer and unzip it. Then, Upload to your WHMCS installation, such that the included blesta.php is unpacked to `~/modules/servers/blesta/blesta.php`

Reseller Account Required

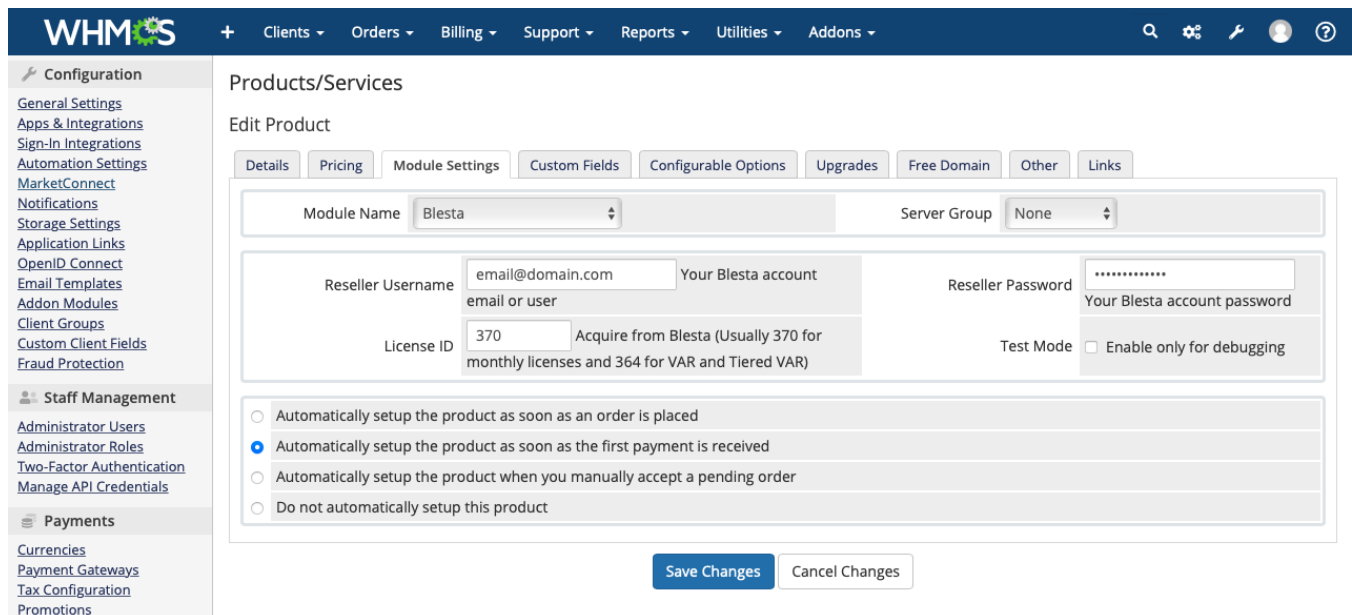

You will need a reseller account for Blesta if you don't have one already. For details on reseller accounts, visit <https://www.blesta.com/resellers/>

Configure Your Products

Go to Setup > System Settings > Products/Services. Create a new Group, then a new Product within the group. When configuring the "Module Settings" tab, you will specify some options to link the product to your Blesta Reseller Account, including:

1. **Reseller Username** - This is the username you use to log into your Blesta account at <https://account.blesta.com/client/login>
2. **Reseller Password** - This is the password you use to log into your Blesta account at <https://account.blesta.com/client/login>
3. **License ID** - This is a license identifier that you obtain from us. For monthly reseller licenses, this is almost always **370**. For **VAR and Tiered VAR**, use **364**
4. **Test Mode** - It's recommended that you do not check this option. Monthly licenses are billed on the 1st of the month, so it's possible to test in live mode and simply cancel the license before it is invoiced.

Your Module Settings tab should look similar to the following screenshot:

The screenshot shows the WHMCS interface for editing a product. The top navigation bar includes links for Clients, Orders, Billing, Support, Reports, Utilities, and Addons. The left sidebar contains a 'Configuration' menu with links to General Settings, Apps & Integrations, Sign-In Integrations, Automation Settings, MarketConnect, Notifications, Storage Settings, Application Links, OpenID Connect, Email Templates, Addon Modules, Client Groups, Custom Client Fields, and Fraud Protection. The main content area is titled 'Products/Services' and 'Edit Product'. The 'Module Settings' tab is selected, showing fields for 'Module Name' (Blesta) and 'Server Group' (None). Below these are fields for 'Reseller Username' (email@domain.com), 'Reseller Password' (masked), 'License ID' (370), and 'Test Mode' (checkbox). A note indicates that the License ID should be 370 for monthly licenses and 364 for VAR and Tiered VAR. At the bottom, there are four radio button options for automatic setup: 'Automatically setup the product as soon as an order is placed' (selected), 'Automatically setup the product as soon as the first payment is received', 'Automatically setup the product when you manually accept a pending order', and 'Do not automatically setup this product'. 'Save Changes' and 'Cancel Changes' buttons are at the bottom right.

Configure Your Product Addons

Starting with the update on April 20, 2021, companies can offer Blesta licenses to their customers as an add-on of a main product.

Go to Setup > System Settings > Product Addons. Create a new Add-on clicking on the "Add New Addon" button. When configuring the "Module Settings" tab, you will specify some options to link the product to your Blesta Reseller Account, including:

1. **Product Type** - This is the type of the product. It must always be "Other".
2. **Reseller Username** - This is the username you use to log into your Blesta account at <https://account.blesta.com/client/login>
3. **Reseller Password** - This is the password you use to log into your Blesta account at <https://account.blesta.com/client/login>
4. **License ID** - This is a license identifier that you obtain from us. For monthly reseller licenses, this is almost always **370**. For **VAR and Tiered VAR**, use **364**
5. **Test Mode** - It's recommended that you do not check this option. Monthly licenses are billed on the 1st of the month, so it's possible to test in live mode and simply cancel the license before it is invoiced.

Your Module Settings tab should look similar to the following screenshot:

The screenshot shows the WHMCS interface with the 'Product Addons - Edit Addon' form. The 'Module Settings' tab is selected. The form includes fields for Product Type (set to 'Other'), Module Name (set to 'Blesta'), and Server Group (set to 'None'). Below these are fields for Reseller Username (email@domain.com), Reseller Password (masked), License ID (370), and a checkbox for Test Mode (unchecked). A note states: 'Acquire from Blesta (Usually 370 for monthly licenses and 364 for VAR and Tiered VAR)'. At the bottom, there are four radio button options for when to automatically setup the addon: 'as soon as an order is placed' (selected), 'as soon as the first payment is received', 'when you manually accept a pending order', and 'Do not automatically setup this addon'. 'Save Changes' and 'Cancel Changes' buttons are at the bottom right.

Custom Fields

Whether you configure the module as a Product or an Addon, it is necessary to create a custom field where the license key will be stored.

1. **Field Name** - "License".
2. **Field Type** - Text Box.
3. **Description** - Leave empty.
4. **Checkboxes** - Leave all checkboxes (Admin Only, Required Field and Show on Invoice) unchecked.

The screenshot shows the 'Custom Fields' form in WHMCS. The 'Field Name' is 'License' and the 'Display Order' is '0'. The 'Field Type' is 'Text Box'. The 'Description' field is empty, with a placeholder text 'The explanation to show users'. The 'Validation' field is empty, with a placeholder text 'Regular Expression Validation String'. The 'Select Options' field is empty, with a placeholder text 'For Dropdowns Only - Comma Separated List'. At the bottom, there are three unchecked checkboxes: 'Admin Only', 'Required Field', and 'Show on Invoice'. A red 'Delete Field' button is in the bottom right corner.

Welcome Email Template

Use the variable: `{service_domain}` in your welcome email template for a primary product, or `{service_product_name}` if an addon, which will be replaced with the Blesta license key.

License Module for Hostbill

Download [blesta-license-module-for-hostbill.zip](#) to your computer and unzip it. Then upload to your Hostbill server.
